https://github.com/EmilyMarkowitz-NOAA https://github.com/eeholmes

GitHub Project
Boards

Kanban task board

Editing markdown files

Branches

Pull Requests

Schedule

8:15-10:45am

15-30 minute lectures and demos followed by 20-30 minute team work time

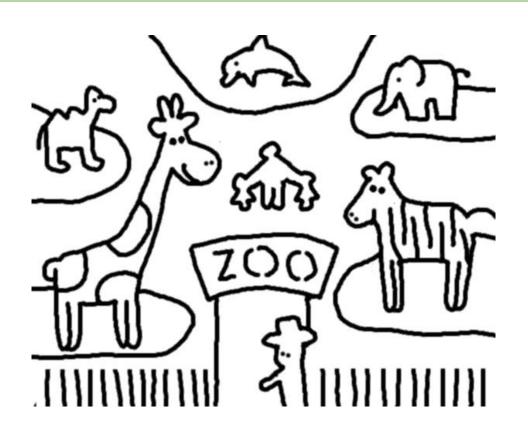

10:45-11am Break with snacks provided

11-12pm Lectures and team work time

Learning warm up! A game!

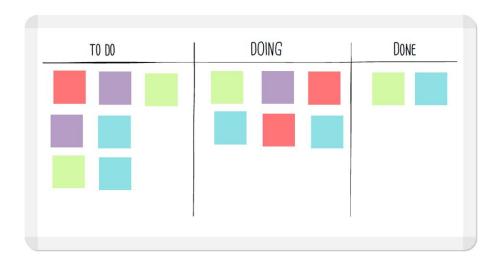

Team Activity: Draw a zoo or zoo exhibit

Use only post-it notes, blue tape, and sharpies for zoo elements

Rules

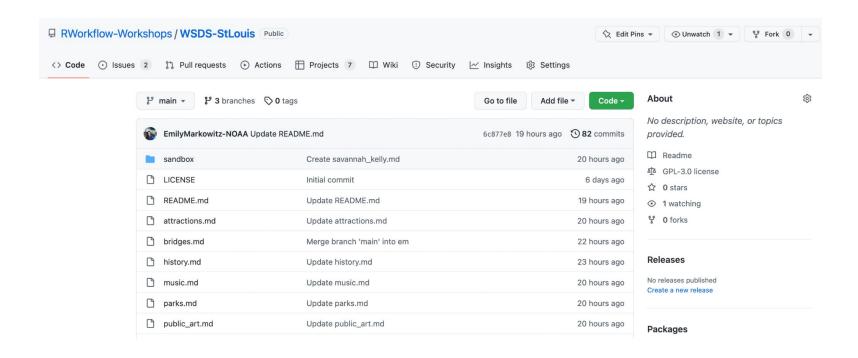

- You can talk to each other
- Only do tasks in the "to do" column
- Only do tasks written by someone else
- Everyone writes tasks
- One task at a time
- Move your task through the board

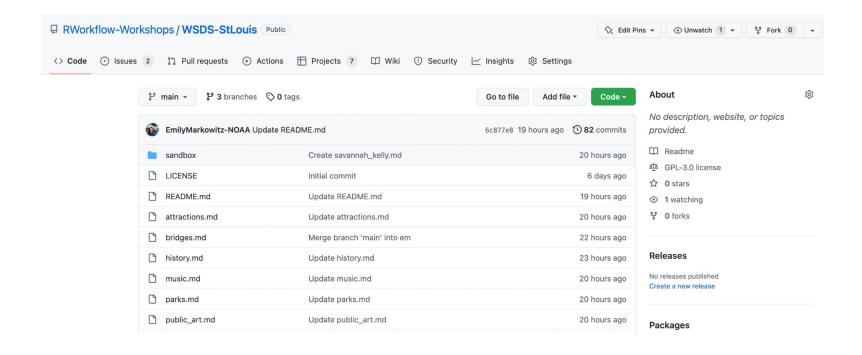

Intro to GitHub in the browser

https://github.com/RWorkflow-Workshops/WSDS-StLouis

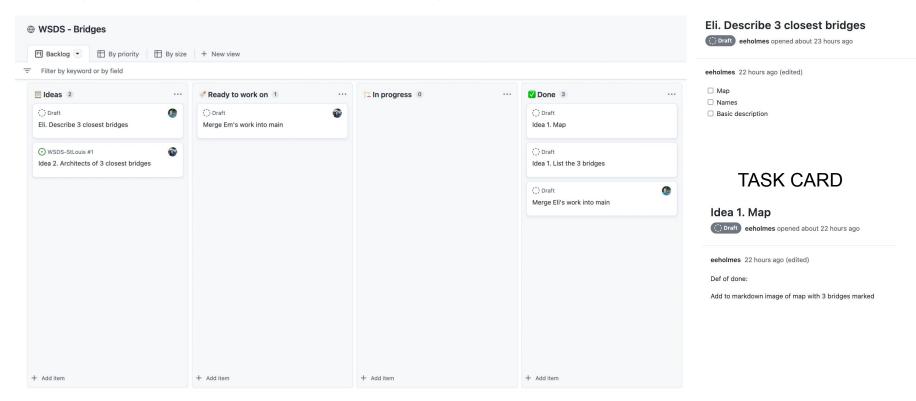

Intro to GitHub in the browser

https://github.com/RWorkflow-Workshops/WSDS-StLouis

Intro to GitHub Project Boards

https://github.com/orgs/RWorkflow-Workshops/projects/6/views/1

IDEA CARD

Eli and Em demo

- 1. Open their team project board
- 2. Add some notes/ideas to the idea column
- 3. Make 2-3 task cards in the task column
- 4. Task cards need 'Definition of done'

Teams

Team work 30 min: Project boards

Add some idea cards (3-4) to your GitHub Project Board

- Idea card is free form; helps you focus your tasks
- https://youtu.be/8D72GBVBVe4

Add some (2-3) task cards for each idea

- Task card must have a "definition of done"
- https://youtu.be/frJoBaQqWml

Tips

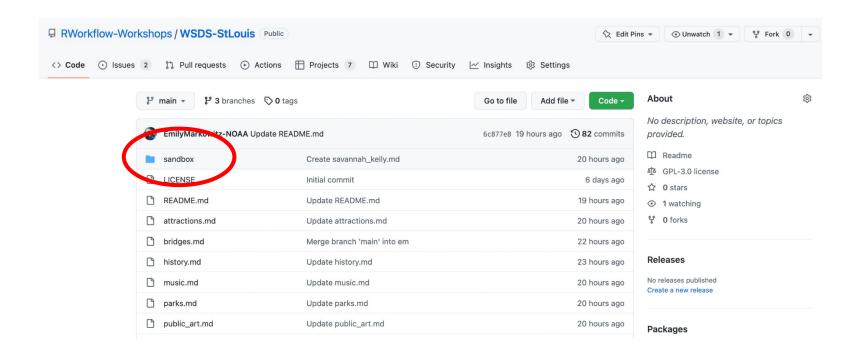

- Don't try to micro-manage with "Definition of Done"
- Let whoever grabs a task card, decide how to get to "done"

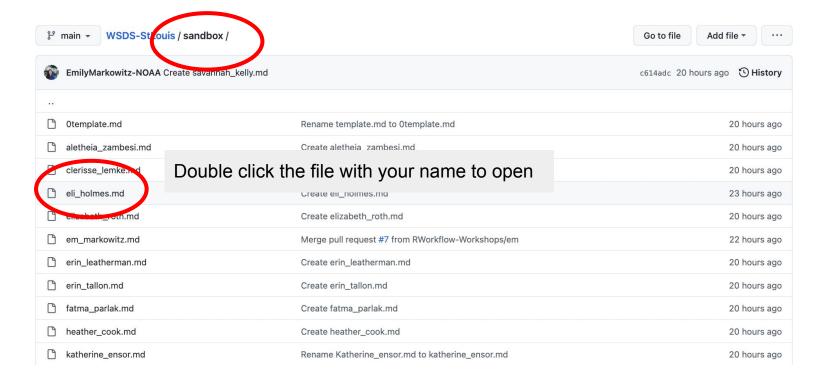

Editing files in the browser

https://github.com/RWorkflow-Workshops/WSDS-StLouis

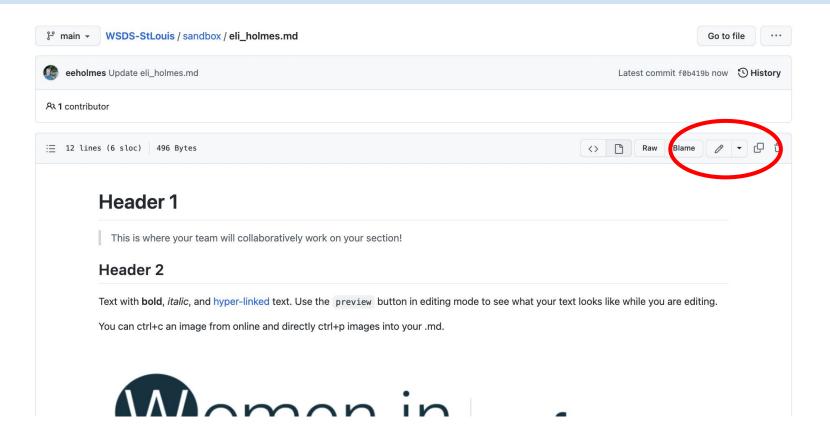

Opening files in the browser

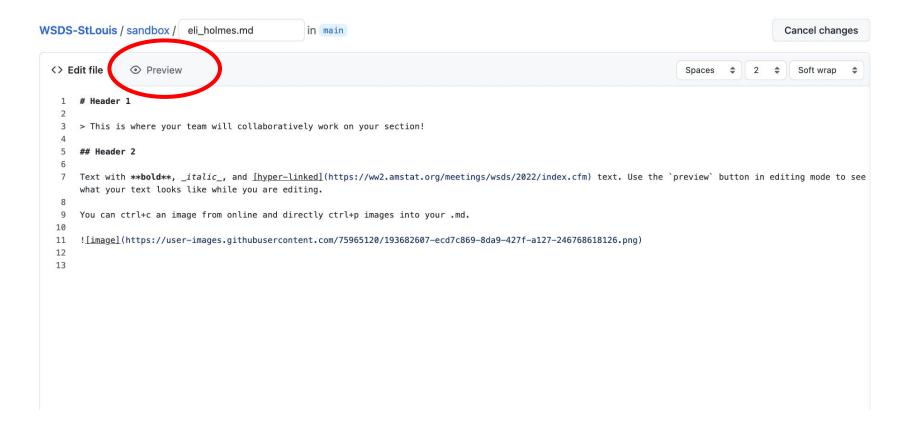

https://github.com/RWorkflow-Workshops/WSDS-StLouis/tree/main/sandbox

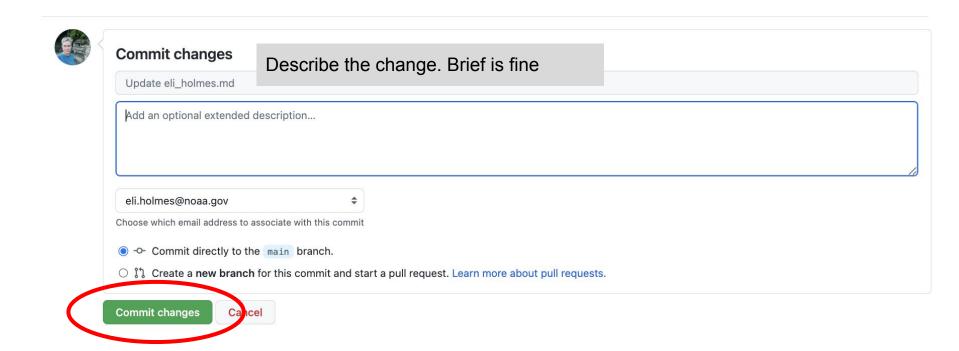

Edit a file

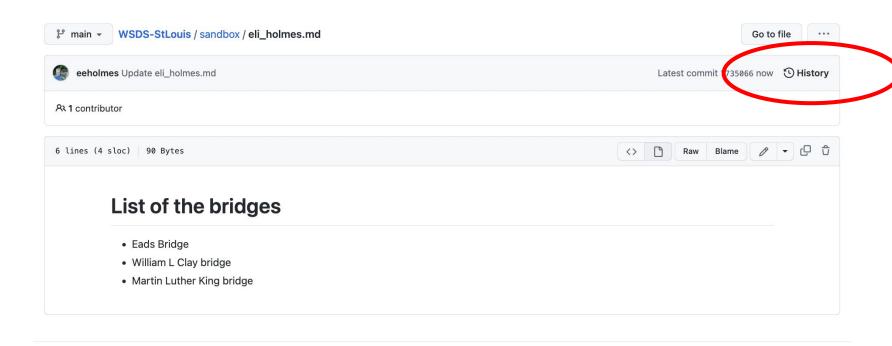

Edit a file: you can preview

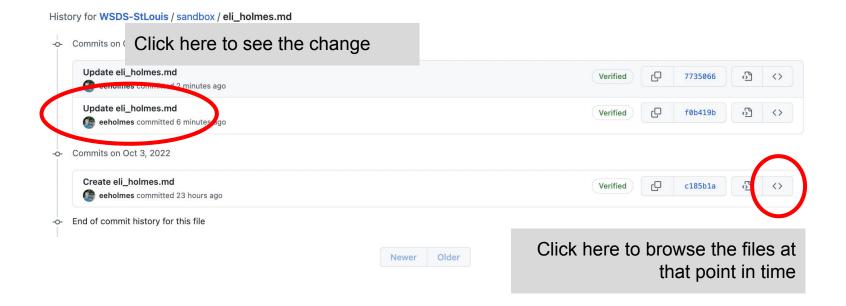

Commit your changes

Click on history to see all the changes

Click on history to see all the changes

Em demos

- 1. Navigate to the sandbox directory
- 2. Open her markdown file
- 3. Make some changes
 - a. Header
 - b. Text with a link
 - c. Add an image

Individual work 20 min: Edit your file in the sandbox

Try

- Adding a header
- Adding a list
- Adding an image

Make multiple commits

 Click the history and look at the history https://www.markdownguide.
org/cheat-sheet/

Images

- You can right-click, copy image, and then paste
- On a Mac, Cmd-Shift-4 gets you a snip tool for copying screen snips

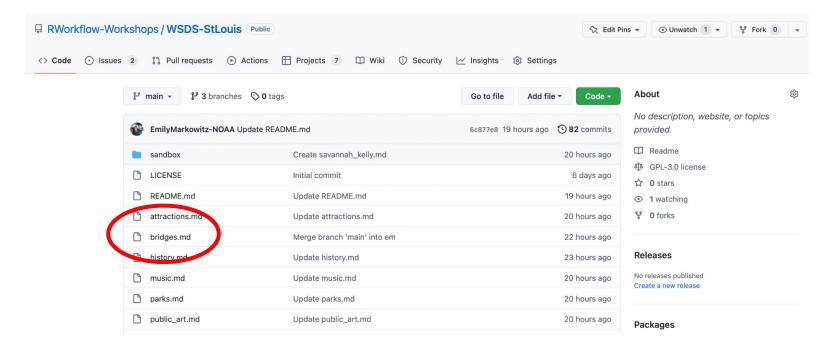

https://youtu.be/Ly4hdNSBKkA

Goal is for the team to edit the one team markdown file

https://github.com/RWorkflow-Workshops/WSDS-StLouis

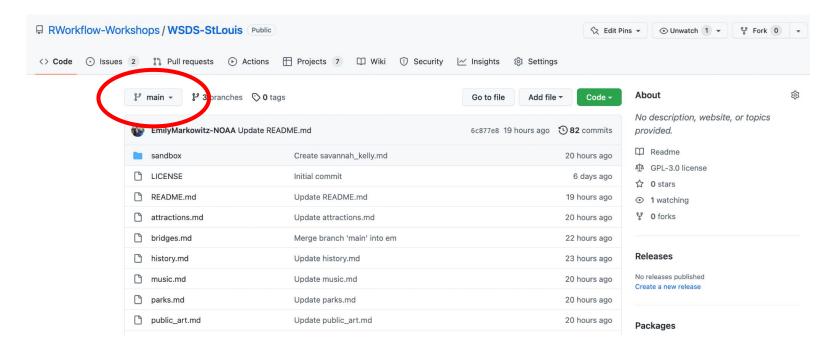

Eli and Em demo bad

things happening if we

both edit our team file

What is a branch?

https://github.com/RWorkflow-Workshops/WSDS-StLouis

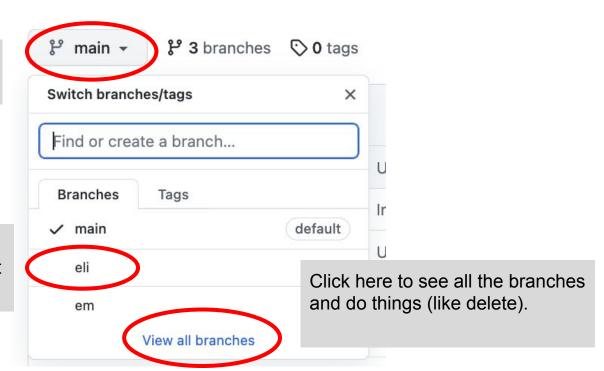

Create a branch in the browser

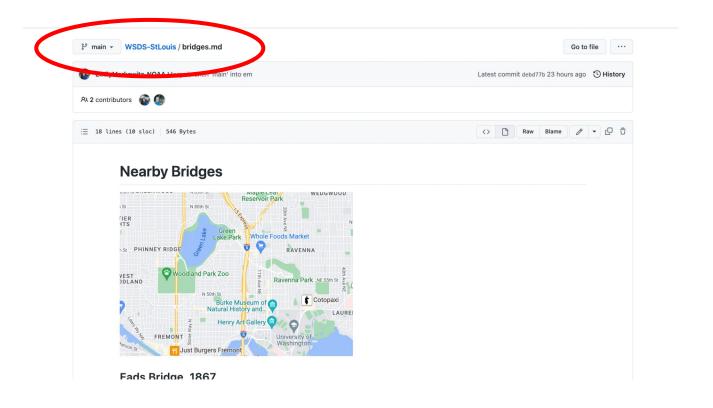

https://github.com/RWorkflow-Workshops/WSDS-StLouis

Click on "main" to get to branch controls

Click on an existing branch to see the status of the repo on that branch

ALWAYS be aware of what branch you are on

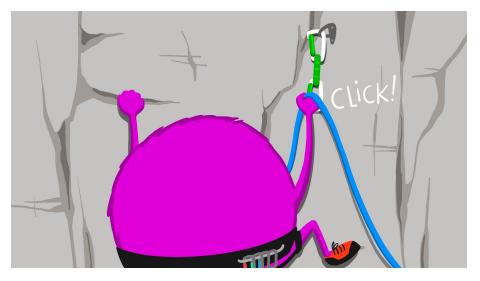

Em demos

- 1. Make a branch FROM MAIN
- 2. Open the team markdown file
- 3. Double-check that you are on your branch
- 4. Edit the file and commit changes

Team work 30 min: Work on tasks on your project board

Steps

- Make a branch FROM MAIN
- Switch to that branch
- Open your team's md file
- Work on 2-3 tasks from your team task board
- Double-check that you are in your own branch

Mark as resolved

Eli and Em demo

- 2. Em makes a pull request, gets merge conflict

1. Eli makes a pull request and merges

- 3. Em resolves the merge conflict and merges
- 3

Team work 30 min: Pull requests

Steps

- Add each pull request to the task board
- One at a time, do your pull requests.
- Move the task cards to done as you do each one
- Work together to help each other

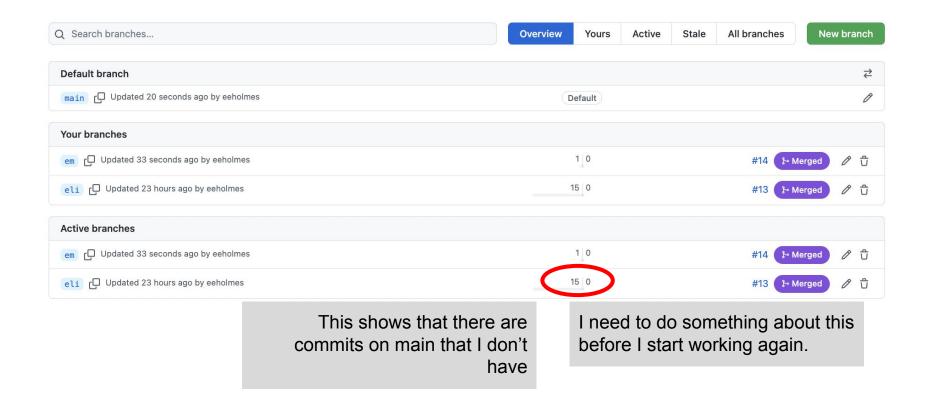

Artwork by @allison_horst

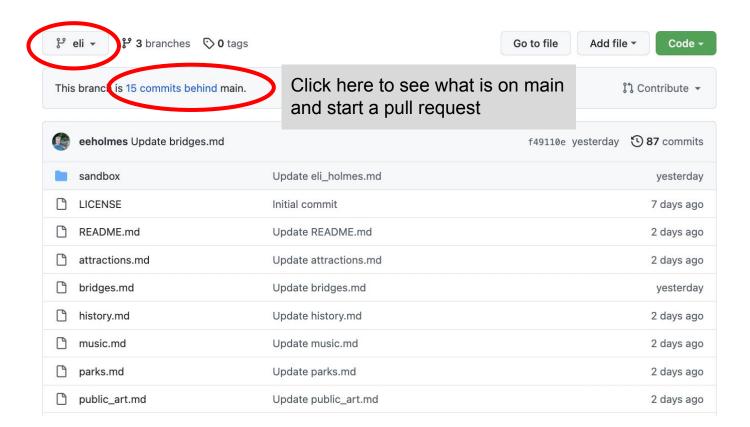

https://youtu.be/wmzjzuWhzq0

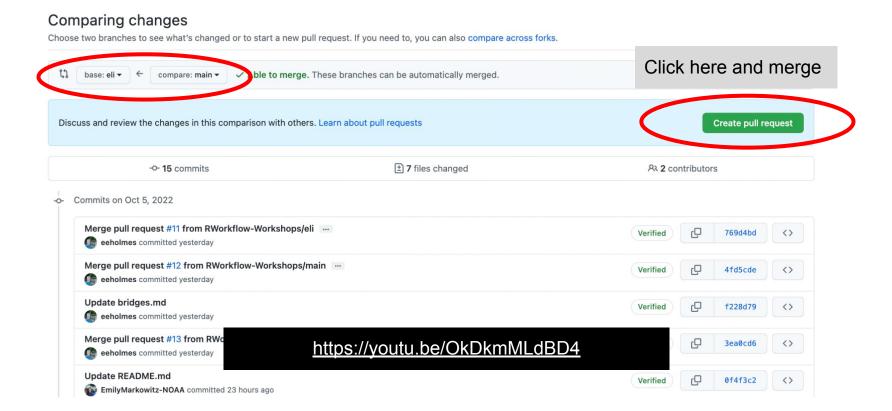

After Em merges her branch, Eli's branch is behind main

We can also see this if I am on my branch

Do a pull request to merge main into your branch

But the normal workflow is to delete your branch!

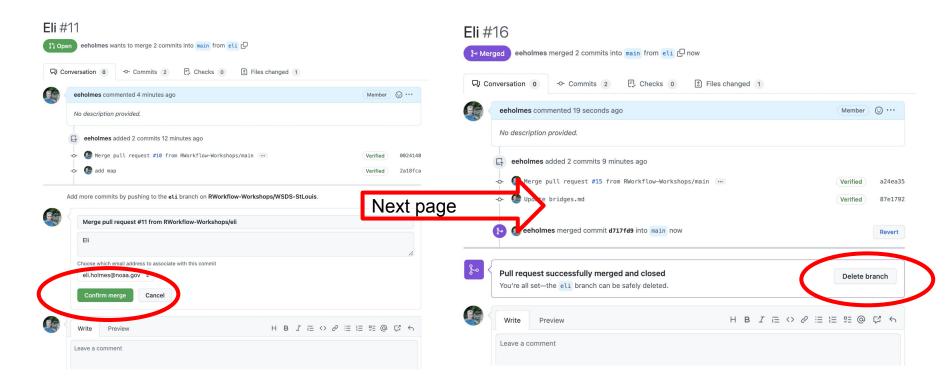

Delete my precious branch??

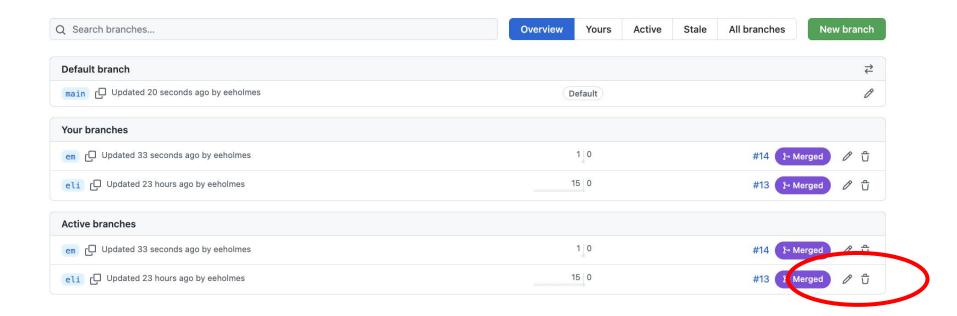

Yes!

- 1. Start task (grab a task card)
- 2. Make branch
- 3. Complete the task
- Merge work into main with pull request
- 5. Delete branch
- 6. Move task card to done column

But the normal workflow is to delete your branch!

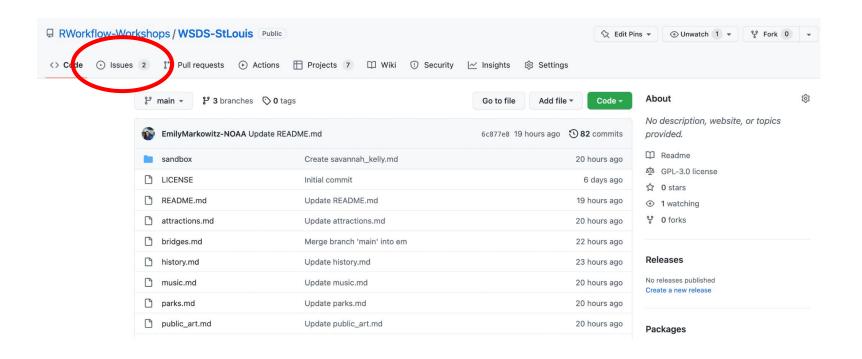

Or delete from "View all branches" page

DISCUSSION and **Q&A**

Next learning steps: GitHub Issues

Next learning steps: GitHub Issues

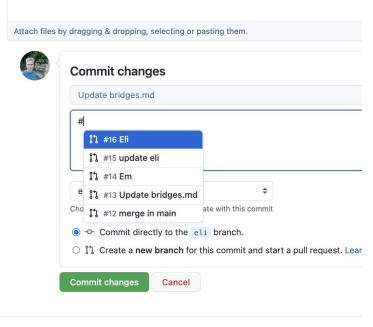

Every team uses issues.

- allow a discussion
- a record of any info needed to resolve that issue
- documents how and when issue resolved

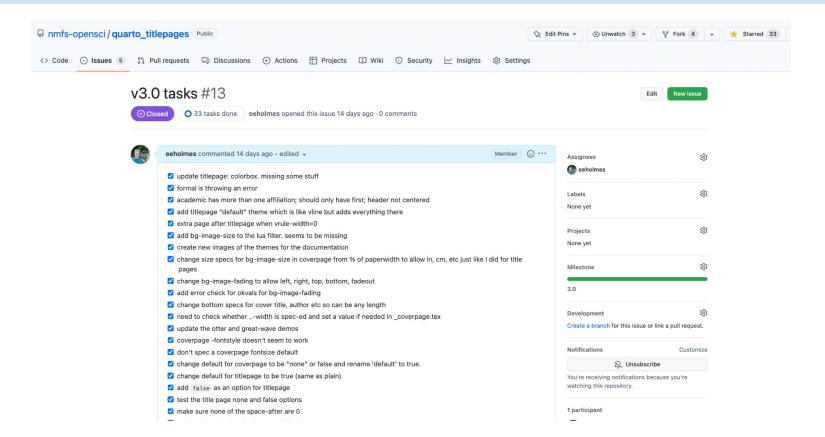

Next learning steps: GitHub Issues

When you commit a change, type # in the description area to select an issue that the commit addresses.

Next learning steps: GitHub Issues with check boxes

Next learning steps for GitHub Project Boards

- Create GitHub issues
- Add them to your project board
- Watch them automatically move to done column on your board when you close them
